

eRoom Viewer for Microsoft Project

The Big Picture

Optimize Project Management

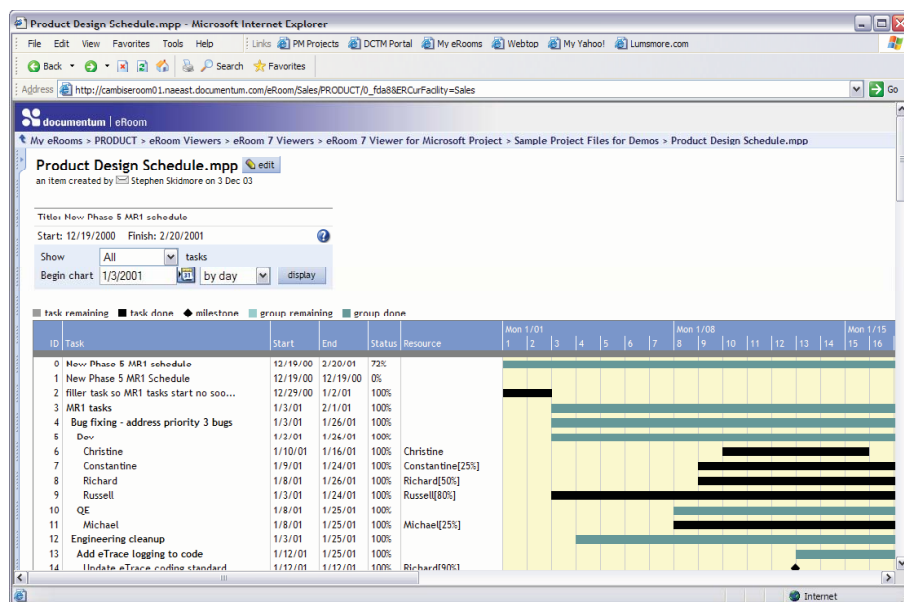

- Hit critical project milestones by offering on-demand access to Microsoft Project task information
- View tasks and relationships via online Gantt charts, directly within the eRoom workplace
- Capture all team interactions alongside project task data in a contextually relevant workspace
- Improve productivity by providing personalized views of task data for each team member
- Enable rapid deployment with server-side installation; no client software to install

With eRoom Viewer for Microsoft Project, companies can improve overall project management by providing all team members with up-to-the-minute project task information. Team members can access a personalized view of their Microsoft Project task lists directly within their eRoom workplace. This server-side Microsoft Project file viewer eliminates the sharing of out-dated task information among project teams, keeping teams focused on hitting milestones and completing projects on time and on budget.

eRoom: A Proven Business Solution

Documentum eRoom is a secure, Web-based workspace that can be quickly tailored for a specific project, process, or business initiative. With eRoom, your employees are better able to plan and manage projects, programs, and processes. They can work more closely with others across the enterprise, and collaborate more easily with external partners, suppliers, customers, and clients. And they leverage a feature-rich collaborative environment to develop innovative products, deliver world-class services, and optimize critical business processes.

With eRoom Viewer for Microsoft Project, you extend the benefits of a Web-based collaborative environment to everyone involved in executing business projects.

Leverage your investment in Microsoft products

The eRoom workplace leverages and extends Microsoft applications and platforms, including:

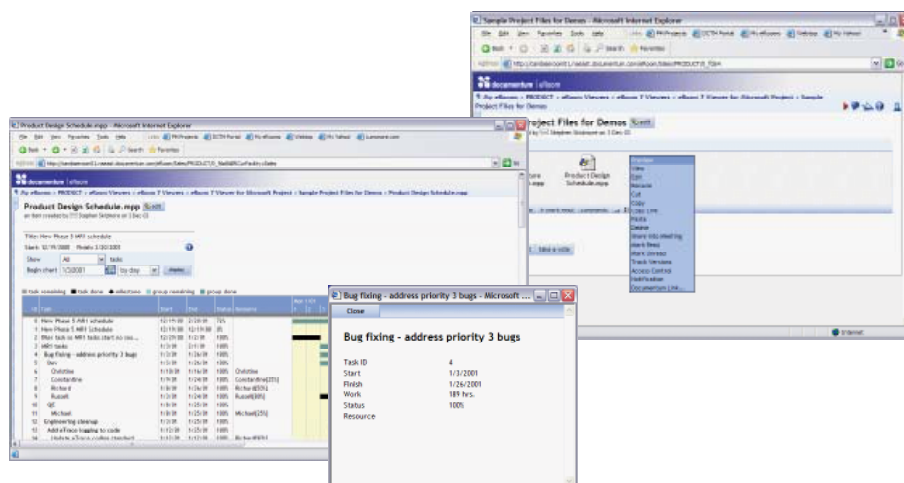

- **Microsoft desktop applications:** Office XP, Office 2000, Internet Explorer, Microsoft Outlook, Web Folders, Digital Dashboard, and Microsoft Project
- **Microsoft platforms:** Windows XP, Windows NT, Windows 2000, SQL Server 7, and Exchange 2000

Feature and Benefits

- Team members can simply click a Microsoft Project file in eRoom to open the Gantt chart view of tasks
- Filters allow users to personalize the view of data according to resource, time period, and start date
- It's no longer necessary to print out Gantt chart handouts that quickly become outdated
- Tasks and resources are hyperlinked, allowing you to easily view complete task data, including task name, start and end date, resources allocated, and work
- Gantt charts provide graphical view of completed and uncompleted work
- You can store files, track versions, and send alerts and notifications with Microsoft Project files, just like any other file in eRoom
- Capture team interactions in contextual workplace environment that were previously spread across e-mail, individual desktops, and file storage systems

About Documentum

Documentum, a division of EMC, provides enterprise content management solutions that enable organizations to unite teams, content, and associated business processes. Documentum solutions support the way people work, from initial planning through sales and service. With a single platform, Documentum enables people to collaboratively create, manage, deliver, and archive all types of content, from documents and discussions to e-mail, Web pages, records, and rich media. With Documentum, organizations improve their competitive advantage by accelerating time to market, increasing customer satisfaction, and reducing operating costs.
