

EMC Captiva QuickScan Pro and EMC Captiva InputAccel Product Feature Comparison List

Document capture solutions for mid-sized businesses

Most organizations are struggling to find fast, affordable solutions to capture and manage the high volumes of paper—and the information it contains—that flood their offices daily. Small- to medium-sized businesses especially must continually seek new and creative ways to stay competitive. By speeding business processes and streamlining operations, these organizations can improve service and reduce overhead costs.

An effective document management strategy focuses on capturing content as it arrives at the organization. Every paper document should go through these steps during the document capture process:

- Batch scanning—Scan multiple documents or batches at once
- Image enhancement—De-speckle, de-skew, and reduce extraneous visual noise
- OCR and BCR—Perform optical character and barcode recognition
- Index—Create an inventory of captured content
- Export—Export data to back-end business systems

Two solutions

EMC® Captiva® has developed two document capture solutions tailored to the document capture needs of small- to mid-sized enterprises—QuickScan™ Pro and InputAccel®. Both solutions go beyond the basics and provide enhanced document capture capabilities.

Which product is right for me?

QuickScan Pro

EMC Captiva QuickScan Pro is an out-of-the-box, single workstation document capture solution built within the ISIS® architecture—the industry-standard interface that unites scanners with software applications. With QuickScan Pro, users can scan in batches of documents and then view automatically separated documents with the ability to manipulate files before exporting them in popular file formats. This solution is ideal for small offices and/or departmentalized document capture deployments.

InputAccel

EMC Captiva InputAccel is a highly configurable intelligent capture solution for enterprise-wide implementations. This product captures and identifies documents and automatically extracts and validates data from these documents before delivering it to line-of-business applications and content management systems. EMC Captiva Dispatcher leverages intelligent document recognition capabilities for automatic document classification, indexing, extraction, and routing. These solutions together provide customers with dramatically advanced enterprise, capture performance, high availability, and scalability, coupled with simplified ease of use, development, and deployment in both centralized and distributed capture environments. This solution is ideal for large offices and/or enterprise-wide document capture implementations.

Use the feature comparison list below to determine whether QuickScan Pro or InputAccel is the best solution for your document capture strategy:

Features	QuickScan Pro	InputAccel
Architecture		
Scalability	Departmental (single user)	Departmental Enterprise level (distributed servers, multiple workstations)
Architecture	Desktop application	Client/server—modular design
Security	Managed mode	Windows Domain Security
Service-oriented	No	Yes
High-availability	No	Microsoft Active/Active clustering technology
Multi-threading capability	No	Yes
Scanning and image capture		
ISIS / TWAIN support	Yes	Yes
Batch processing	Yes	Yes
Document or page level processing	No	Yes
Image enhancement filters	Yes	Yes
Color image enhancement	Yes	Yes
Rescan	Yes	Yes
Page registration	No	Yes
Client-side script support	No	Yes
Multi-function printer (MFP) integration support	No	Yes
Extraction and validation		
Zonal OCR	Yes	Yes
ICR	No	Yes
OMR	No	Yes
Full-page OCR	Yes	Yes
Barcode recognition	Yes	Yes
PDF 417 (2D barcode) recognition	Yes	Yes
Field type validations	No	Yes
Database validations (ODBC)	No	Yes
Document separation, classification, free-form extraction		
Document separation—Page count, blank page, barcode, patch code	Yes	Yes
Intelligent document recognition (structured, semi-structured, unstructured)	No	Optional (Dispatcher)
Free-form data extraction	No	Optional (Dispatcher)
Check reading capability/support	No	Optional (Dispatcher)
Character reject/repair and validation support	No	Optional (Dispatcher)
Automated invoice classification and data extraction	No	Optional (InputAccel for Invoices)

Features	QuickScan Pro	InputAccel
Export		
XML export	Yes	Yes
PDF conversion	PDF image only, image + text	All types
EMC ApplicationXtender® export	Yes (included with ApplicationXtender)	Yes
Other ECM exports	SDK available	Optional
Data and document export	Yes	Yes
Simultaneous exports for a single batch	No	Yes
Multiple index stations per batch	No	Yes
ODBC export support	No	Yes
File renaming based on barcode value	Yes	Yes
Microsoft SharePoint exporter	Yes	Yes
Customization—Application and capture flows		
Customizable capture workflows	No	Yes
Conditional document routing	No	Yes (Process design)
Capture process setup	Point and click setup	Process design environment (VB script)
Customization	Point and click setup, SDK available	VBA process design, SDK, source code
General		
Tree view	2 levels	7 levels
Annotations	Yes	Yes
Forms processing	No	Optional
Web-based distributed capture	No	Yes
Distributed server environment	No	Yes
Third party application integration	Optional	Optional
Command line control	Yes	N/A
.NET technology support	No	Yes
Web Services import/export	No	Yes
Integrated system reporting	No	Yes
Build custom reports	No	Yes (Crystal Reports)
Shared scanner profile settings	No	Yes
Index families support	No	Yes
Web-deployable clients using MS ClickOnce technology	No	Yes
Virtual server support	No	Yes
Licensing		
Licensing	Workstation license	Volume-based (PPY) and module licensing
Page volume	Unlimited	Unlimited
